

January 11, 2017

Happy New Year. We had a really nice year last year, we won a few awards had an awesome Christmas Party and hopefully the coming year will be as good !

Yoshi's birthday january 30 – HAPPY BIRTHDAY!

January is usually pretty slow so we will focus a lot on clean up and reorganizing some things. We are also hoping to get the showroom finished. Mirel will come by with his crew and hopefully finish this month. Iacob and the crew will start building office furniture for Matt, Yoshi and Flavius' offices. We'll start with Flavius.

Upstairs mezzanine needs to be cleaned out. Flavius to designate a person (Robert) to go upstairs with him and throw away any items we don't need as well as things that need to be returned (if possible) to Richelieu. Yoshi will take care of the returns. Please remember to dust the Rails to the mezzanine and the light fixtures every week, they accumulate dust very fast.

Safety:

After doing a walk around the shop today I noticed the following items that need our attention:

There are a few boards stored against walls the locations were:

- under the stairs, by the entrance to the spray booth
- by the CNC specifically leaned against the wall towards
- by the production office

We heard some people clean themselves with compressed air. please do NOT clean yourself with compressed air. It's very dangerous !
