

February 16,2021

Monthly Safety Meeting

Staff present:

Radu, Matt, Flavius, Monika, Nicu, Sandu, Ica, Anja, Jeff, Iacob, Alvi, Yuriy, Mario

Thanks for continuing to pray for Francis' family. The cancer is spread and he is now under palliative care. please continue to pray.

Julio has decided to quit due to family reasons. We wish him all the best. Forklift test went very well. Everyone now has their license. Weather still cold, We had -7 degrees so please keep up the salting of the driveway. Also we should go over the COVID protocols again. It seems that the state of the emergency will be extended. At least we are still open and the jobs are steady. We still have Virkon. Monika to source some more. It seems we have not seen the end of the pandemic. Still difficult to get gloves. Try to not change them as much FVIS said they are all out, Costco is all out ... all major suppliers are out. You can reuse them and spray virkon disinfectant on them routinely during the day.

- thanks Matt for taking care of the road salt. We had no slips and falls
- we had a noise complaint from the neighbour about dust collector being too loud. Although we are situated right next to the train track and the passing trains emit decibels over 120 (and our dust collector is only emitting 89 decibels if you stand right UNDER it) we will buy a new belt and Nicu will install it.
- Cindy our new coworker will be starting in March . Time to brush up on our anti bullying and harassment policy. It will be emailed to you. Please read and sign

Any issues?

Matt: someone forgot the door to the gas meter open. Please make sure it is always locked.
Monika: some of you were reporting that your access codes are not working, please come to me one by one after the meeting to see if they work

Next meeting: march 6,2021
